

MATHEMATICS

We want all students to leave Christ's College with confidence in Mathematics and the ability to carry out the key skills that they will need in later life. Mathematics teaches students to think logically and find ways to solve difficult problems. Where possible, students will look at real-life contexts for their work.

GCSE Mathematics		

ASSESSMENT

Paper 1	<ul style="list-style-type: none"> Non-Calculator (33%) 	All of the papers contain Questions on: <ul style="list-style-type: none"> Algebra Shape Space and Measure Data Handling
Paper 2	<ul style="list-style-type: none"> Calculator (33%) 	
Paper 3	<ul style="list-style-type: none"> Calculator (33%) 	

EXPECTATIONS

GCSE Mathematics is a compulsory course. There is no coursework requirement and it is assessed through three written papers at the end of the course in Year 11. One paper will examine students' skills in working without a calculator and the other two will test their ability in topics where a calculator is essential. The course extends the work covered in Key Stage 3.

To do well in mathematics, make sure you bring equipment to every lesson, know your times tables, use websites to help you improve your understanding of various topics, use individual learning packages, and complete all classwork and homework to the highest possible standard.
